

HD

**Uncompromising** vision with Bosch HD Solutions  
The difference is in the details

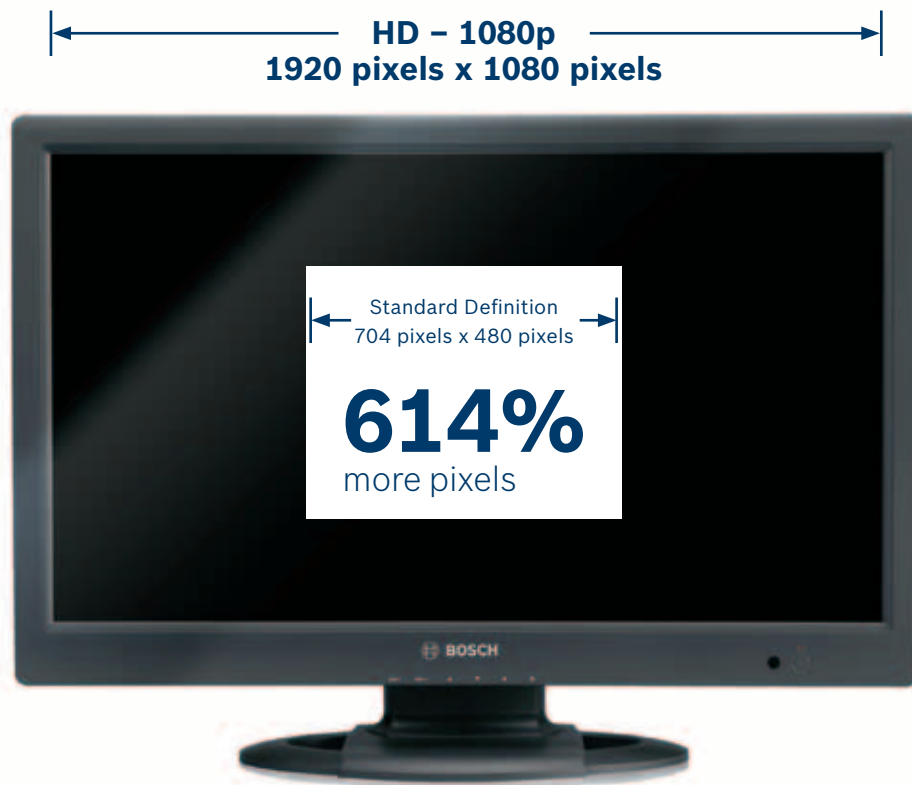

**BOSCH**  
Invented for life

# More pixels **More possibilities**

Bosch HD takes image resolution to the next level. Highly detailed images allow operators to better distinguish individuals or small features. HD also delivers a widescreen format that captures more useable image content, reducing the amount of empty sky or foreground in a scene.

The level of detail in Bosch HD images captures extensive information throughout the whole scene. Small feature recognition – such as faces or number plates – is much easier. Also, live or recorded content can be examined more closely by zooming in while still maintaining a sharp image.

“I need to protect my customer's investment”

**Daniel J. Hilbert**  
VICE PRESIDENT SALES  
Copp Systems Integrator

## All that **HD** can be

Bosch has an uncompromising vision to deliver high quality, easy-to-use, smart and interoperable security solutions. With over 40 years of delivering innovative surveillance systems, Bosch brings its considerable experience to bear in high-definition (HD) solutions.

Our HD portfolio offers you a complete solution across the entire surveillance chain – from scene to screen. Every component is designed specifically for HD technology, so you can be sure that ‘HD in’ equals ‘HD out’.

“I expect a solution that’s simple to install and easy to use.”

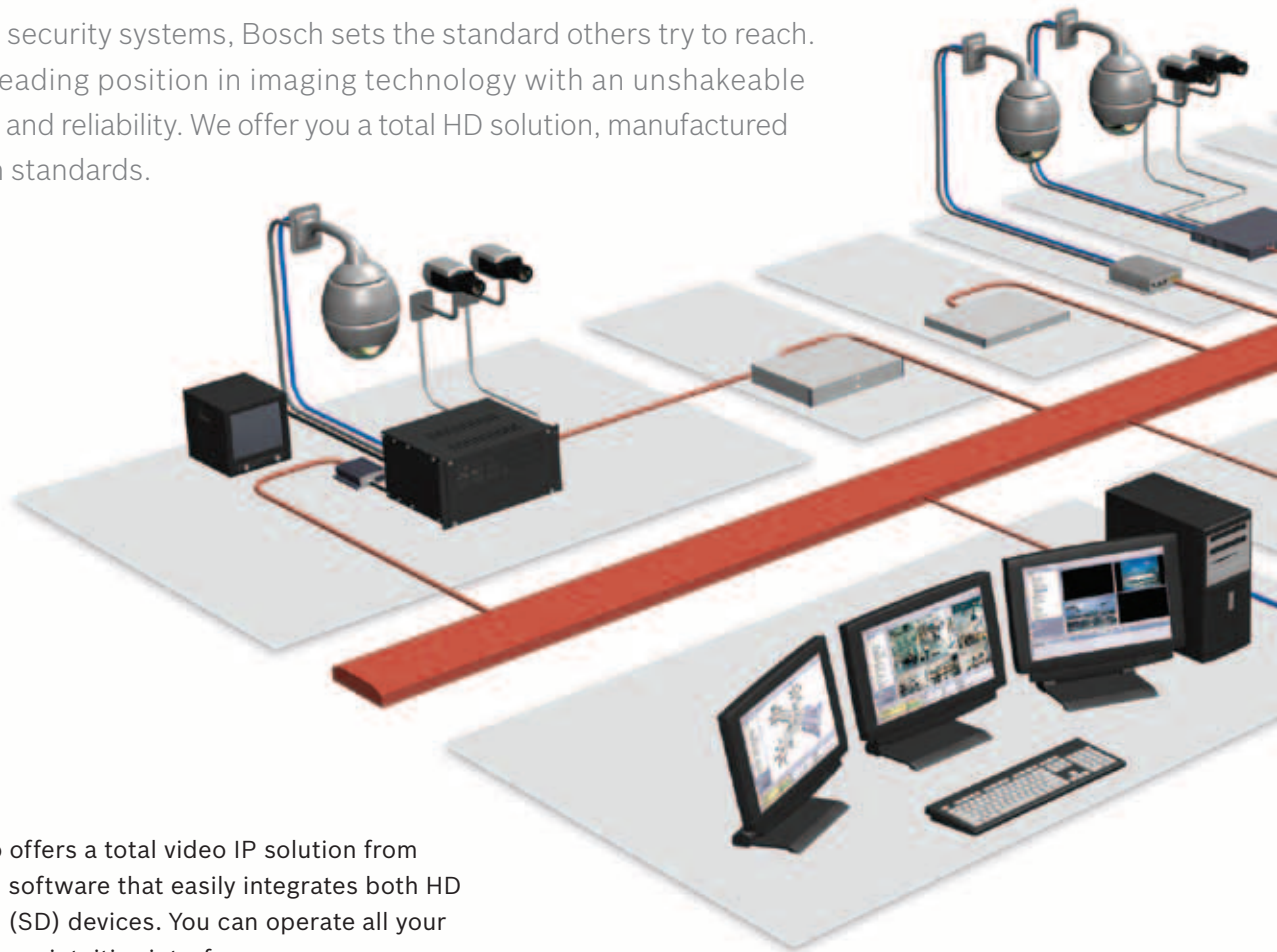

**Ke Hong**  
CHIEF OFFICER  
Shanghai Ridan Smart Tech Co., Ltd.

# A total HD solution

## Integration & expansion

An industry leader in security systems, Bosch sets the standard others try to reach. Bosch combines a leading position in imaging technology with an unshakeable reputation for quality and reliability. We offer you a total HD solution, manufactured to the highest design standards.

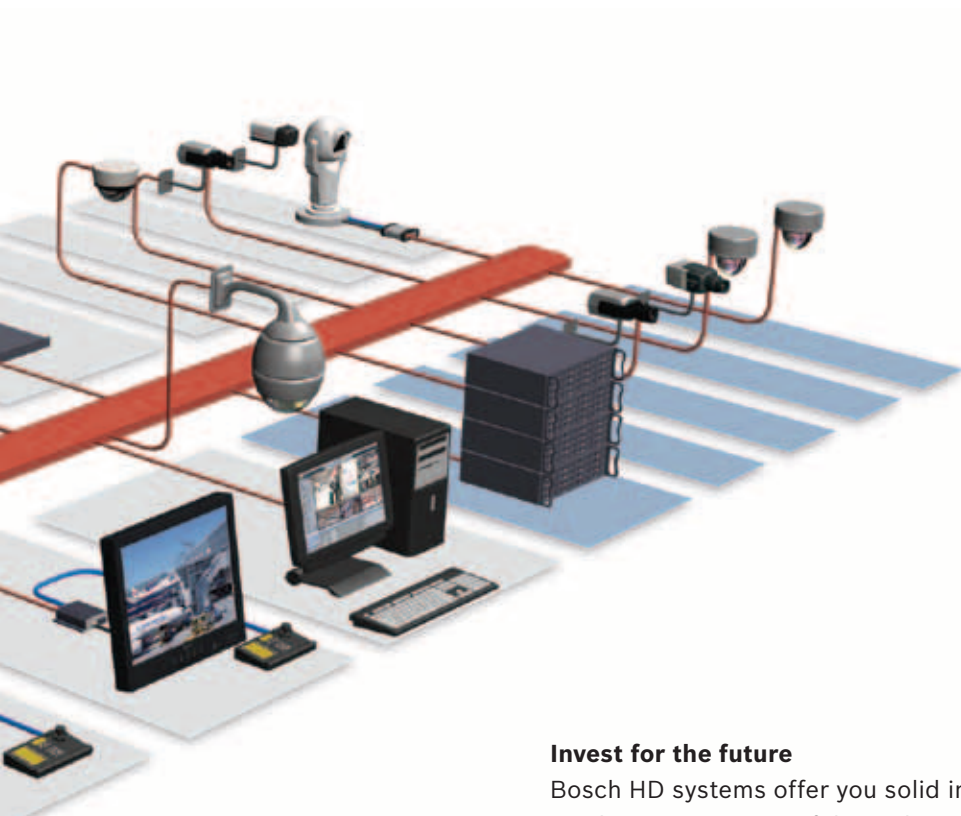

### Easy to integrate

The Bosch HD portfolio offers a total video IP solution from camera to monitor with software that easily integrates both HD and standard definition (SD) devices. You can operate all your video appliances using one intuitive interface.

Leading the way in interoperability, all Bosch HD products conform to the ONVIF standard, ensuring they integrate easily with third-party security solutions. We also provide a broad range of SDK tools, so you can tailor the system to your individual requirements.

- Standard Definition Components
- HD Components

**Growing with you**

Bosch leads the market in video storage with the latest video management and iSCSI solutions for storing both video and related IVA metadata. Our scalable-system philosophy makes it easy to add greater capacity as your requirements grow.

**Invest for the future**

Bosch HD systems offer you solid investment protection. Like all Bosch products, our HD portfolio is thoroughly tested to deliver the highest reliability, keeping maintenance costs down and your system operating 24/7. Our intuitive video management and user software simplifies training needs, further reducing the total cost of ownership for your security systems. And your existing investment is protected as you can add and easily mix HD with SD devices.

**Intelligent video analysis**

From motion detection to advanced Intelligent Video Analysis (IVA), our HD solution provides outstanding support to your security team. HD-optimized video analysis reinforces your security capability, ensuring optimum monitoring and alarm performance.

**Detail Recognition**

The level of detail in Bosch HD images makes small feature recognition – such as faces or number plates – much easier.
